We should report that, again today, a person by the name of [Me'mar Shomali] came with a number of construction workers and continued to demolish the remnants of this place. They have also threatened the local residents with eviction and persecution. Therefore, we appeal to you for an immediate investigation into this matter and [ask you to] prevent further demolition of this location, which is sacred to the Baha'is of the world, who are spread over 96,000 localities.

Respectfully
